

# 16-in-1 Water Test Kit

Our water test kit was designed for quick and easy visual screening on different sources of water (Drinking water, Well water, Pool & Spa, Aquarium and etc.) Can be used to get a snapshot of your water status and continually monitor your water condition.

Please refer to below table for different applications of all 16 parameters.

Email [info@sjwave.com](mailto:info@sjwave.com) for questions and comments

No.	Parameter	Application
1	Total Hardness	Drinking water, Pool & Spa, Aquarium
2	Free Chlorine	Drinking water, Pool & Spa, Aquarium
3	Iron	Drinking water
4	Copper	Drinking water
5	Lead	Drinking water
6	Nitrate	Drinking water, Aquarium
7	Nitrite	Drinking water, Aquarium
8	MPS	Pool & Spa
9	Total Chlorine	Drinking water, Pool & Spa, Aquarium
10	Flouride	Drinking water
11	Cyanuric Acid	Pool & Spa
12	Chlorine Dioxide	Drinking water
13	QUAT/QAC	Pool & Spa
14	Toal Alkalinity	Pool & Spa, Aquarium
15	Carbonate	Aquarium
16	pH	Drinking water, Pool & Spa, Aquarium

## STORAGE

For long term reliable and accurate results, store in a cool and dry place. Keep sealable bag tightly sealed between every use.

## SHELF LIFE:

24 months before opening of each sealable bag.  
90 days after opening of each sealable bag.

## DIRECTIONS

- 1 - Remove one strip from a sealable bag and immediately seal the bag tightly.
- 2 - Immerse the reagent area of the strip in the water sample for 2 seconds (you can use the testing tube or dropper provided or use your own container to collect water sample). Use a clean paper towel to absorb excess water from the edge of the testing pads
- 3 - Hold the strip horizontally for 30 seconds and compare results against colour chart provided.
- 4 - Read the results within 30 seconds in good light for most accurate results.

Note: The recommended range of Drinking Water is outlined in the color chart.
